Pulse plugs may look similar to spark plugs on the outside, but inside the technological advances of Pulstar™ are evident. Pulse plugs feature a unique pulse circuit that captures energy wasted by spark plugs and dramatically increases discharge power by up to 20,000 times.

Pulstar™ Pulse plugs are different and simply better than spark plugs. As compared to other aftermarket products like cold air intakes and high-efficiency ignition systems, Pulstar™ is the most cost-efficient horsepower you can buy for your car. And when you are not using that extra horsepower, Pulstar™ actually pays for itself with fuel efficiency.
