New York hardest hit

FOR IMMEDIATE RELEASE

NEW YORK/EWORLDWIRE/March 21, 2009 --- Daniel Osorio, like many others, is no stranger to calamity - ordinary citizens stricken by blindness, for whatever reason. Osorio, however, in the tradition of Nostradamus, has been led to see where others can't, and the blind man is out heralding the coming of crisis looming on the horizon with publication of, "The Wrath, The Return, The Truth: Judgment has begun."

While the primer is applicable to all Americans, Osorio asserts that those who live in New York should take particular note of his discourse, since the contents are specifically related to his home city's fate in the end of times.

Despite the controversy his penned works and fantastical stories have stirred up in religious communities, Osorio has been pushing the limits of modern day belief systems by recounting the messages delivered in his dreams since losing his vision in 1996 from diabetes complications. Although he clearly understands the rejection and denial of his predictions he has already experienced, he is unshaken - and undeterred - in his vision of convincing people to approach his text with an open mind.

"Some believe that tragic events are no accident," stated Osorio. "If we take few minutes to sit back and examine what's confronting us today - a record the number of natural disasters occurring consecutively, along with political, social and economic trends - and face these issues with teachings of the church related to the Rapture and passages in the Bible, we unwittingly find gross inaccuracies and misinterpretation."

"It is my commission to reveal conflicting beliefs and teachings of the church, and to remedy the church's misinterpretation and inaccuracy of the portrayal of the Rapture and the Great Tribulation," affirmed Osorio.

Osorio's personal story reflects his strength and conviction, and he recognizes that the contents of his book and the interpretation of his dreams is a matter of opinion. Osorio said, "If what I provide was written under

false pretenses, never to happen, then readers will have lost nothing - but if what I present came about from the truth by Godly discernment, and it is rejected, the consequence is that they will definitely lose everything."

The author points to one specific reference as a single piece of supporting evidence: of having seen a dark cloud over New York, and the representation of what he recognizes as the black bull - and an economic bull market. "Even if the public is skeptical about these revelations, can they honestly deny the facts that relate the revelation of the black bull with the instability of our nation's economy?"
