

GOD'S 9/11 REPORT

The real truth about Terrorism and Natural disasters in the world

WARNING

It is a fact that five years after the 9/11 terrorist attacks, terrorism continues to affect the American public. During this five year period, the best political, religious, economics and military minds from all levels have written hundreds of books about formulas, strategies and plans to use in confronting and effectively managing the terrorism problem the world continues to suffer from and live in. However, in reality and on a daily basis we see that even though America has implemented measures to detain terrorism, it continues. Terrorism hasn't been stopped by any of the strategies, plans or formulas developed by the best minds in the American nation.

Before buying this book, I must warn you that if you think God's 9/11 Report is just another book that exposes and presents solutions to man that go outside of the sovereign plan predestined by God-to present ways to confront the terrorism problem in America and the world - I have to tell you, this book is not for you. On the other hand, if you are truly interested in knowing what the Lord, what the true and only God, the God of the Holy Bible, reveals to us and teaches us through his word in regards to terrorism; if you are interested in knowing what is the best manner, the best plan, the best strategy, the best method of response the Lord gives us, what He reveals to us and teaches us about confronting the terrorism problem that lives in America and the world, in an effective and positive manner, the Lord will answer all those questions in God's 9/11 Report. The Lord will also give answers to all the questions that the best of minds in America and the best minds in the world haven't been able to give to the American people.

For many, God's 9/11 Report will be a spiritual emergency, a national emergency that people must read to comprehend it, love it and teach it. For others this will be like any other book. God's 9/11 Report will answer questions like:

1. What is the real terrorism in America?
2. Why has the 9/11 Senate Committee failed to detect or identify the real cause of terrorism in America?
3. Why has the entire national security system also not been able to identify it?
4. Why is it that the entire American national security system also not been able to find Weapons of Mass Destruction?
5. Where are the real WMDs?
6. What are the real WMDs?
7. How do you combat WMDs and terrorism in America?
8. Why did the newly formed national security agency, Homeland Security, and FEMA fail in the midst of hurricanes Katrina and Rita?
9. Why will all the national security agencies continue to fail in the face of the next natural disasters?
10. What is the next natural disaster that will erase the nation of Iraq on the map?
11. Why will that natural disaster destroy the world?
12. Why will America and the world be out of control in trying to confront that worldwide natural disaster?
13. Why is it that the famous peace plan or road map to peace will never bring peace and security to the Middle East?
14. Who will win the war in Iraq and Afghanistan, and why will they win?
15. Why has America already lost the war in Iraq and Afghanistan?
16. Why is the real time table for taking the American troops out of Iraq?
17. What will happen to American troops if they do not withdraw on time?
18. Why has the American constitution turned into a dysfunctional constitution for confronting terrorism?
19. Who is the real author of The DaVinci Code?
20. Why has the American nation turned into a land full of idol?
21. Why will new laws for controlling illegal immigration in America not work?
22. What will be the final result between the terrorist organization of Hezbollah and the nation of Israel?
23. Why will America be paying 300 dollars for a barrel of oil?

All these questions and many, many more are answered in God's 9/11 Report. Peace, security and all the answers America and the world haven't been able to give us, God's 9/11 Report will give its readers.

Amen. J.C. Sirvientes.
