## **Digital Descriptor Systems, Inc. To Introduce Breakthrough Security Products At 19th Annual Police And Security Expo**

For Immediate Release

SEA GIRT, N.J./EWORLDWIRE/June 6, 2005 --- Digital Descriptor Systems, Inc. (DDSI) (Pink Sheets: DDSI), an industry leader that develops and markets security products for criminal justice organizations, will be announcing a line of breakthrough security products developed by its wholly-owned subsidiary, CGM Applied Security Technologies, at the 19th Annual Police and Security Expo in Atlantic City, NJ, June 21-22, 2005.

"This is an example of the breadth of products and services our combined companies can offer to support security and identification needs across a broad market spectrum," explained Anthony Shupin, Chairman and CEO of DDSI.

The first product, SecureTRAC(R), a specialized sealing tape, reveals if anyone has attempted to remove or reseal the tape. SecureTRAC shows a customized signature if attempts are made at removing it and any attempt at resealing is negated. To date, SecureTRAC has been used by over 2000 international companies including major airlines, pharmaceutical clients, and numerous government agencies.

Erik Hoffer, President of CGM AST, commented, "the introduction of SecureTRAC to local criminal justice organizations is a natural fit. With the stringent chain of evidence requirements and long-term storage issues, SecureTRAC is the product that will resolve most, if not all, issues regarding evidence collection."

SecureTRAC has built-in tracking and security measures that are unparalleled in the industry. SecureTRAC is sequentially numbered every 9 inches making it easy to positively identify collected parcels--regardless of size or shape. The sequential numbers on each roll provide the ability to track and sort through packages instantly. CGM also incorporates Secure TRAC into its plastic evidence collection bags. Unlike conventional hot melt bags, these security bags cannot be opened with freon or heat, making them a better choice for short or long term storage of evidence. CGM will show these products along with its other offerings at the Police and Security Expo.
