

DDSI Digital Descriptor Systems, Inc.

Digital Descriptor Systems, Inc. Subsidiary To Display Transportation Security Technology Offerings At Intermodal Expo 2005/ TranComp 2005

Will Showcase Advanced Container Security, TS4A(R) Air Brake Locks And Rig-Lok(R) Door Locks

For Immediate Release

ANAHEIM, Calif./EWorldWire/Nov. 11, 2005 --- Digital Descriptor Systems, Inc. (DDSI) (Pink Sheets: DDSI) subsidiary, CGM Applied Security Technologies (CGM AST) is displaying its broad line of transportation-focused security offerings at the Intermodal Expo 2005 / TransComp 2005 event, which begins today in Anaheim, Calif.

"This is a transportation industry event, and so provides us an excellent opportunity to highlight our advanced technology, and demonstrate how effective it can be in securing shipments around the globe," said Erik Hoffer, president of CGM Applied Security Technologies, Inc.

Specifically, DDSI and CGM AST will exhibit:

- **TS4A air brake locks** - Designed to secure tractors from theft, this device literally blocks the air line from the air brakes in the tractor and, if attached, the trailer. Once the system is employed, the rig simply cannot be moved until the lock is released. The device can be inserted into any air brake system, and modifications are readily available for all tractor models used in the United States.

- **Rig-Lok door locks** - To protect both roll-up and swing-open warehouse and facility doors, this new system employs a unique trigger and locking mechanism design, which is deployed as soon as the door is closed. Thanks to a locking pin that is actually welded into the doorframe, Rig-Loks resist shattering, even if they're accidentally rammed by a forklift.

- **Container security technology** - Whether shipped via rail, roadway, ship or plane, containers are subject to vandalism, tampering and theft. DDSI and CGM AST offer a wide array of container protection options, including - but not limited to - the Navalock series of locks, high-security cable and bolt seals, tamper-indicating loop seals, Topp Clip pallet security and Secure Trac door seals.

Located in the Anaheim Convention Center, Intermodal Expo 2005 / TransComp 2005 runs through November 15. The DDSI and CGM Applied Security Technologies exhibit is located at booth #282, on Level One of Exhibit Hall C.

About Digital Descriptor Systems, Inc.

Digital Descriptor Systems, Inc. develops and markets integrated enterprise-wide image applications specifically designed for criminal justice organizations. Customers include states, cities, counties, corrections, justice and public safety agencies.
