

ControlScan Certifies Full Spectrum Solutions As A Safe Shopping Site

In an effort to increase its Internet security, Full Spectrum Solutions, a leading online lighting manufacturer, announced today that it has become certified by ControlScan.

For Immediate Release

MARIETTA, Ala./EWORLDWIRE/March 20, 2006 --- As a measure to increase privacy and security and to prevent hackers and thieves from accessing sensitive information from its customers, Full Spectrum Solutions,(www.fullspectrum.com) hired ControlScan and subscribed to the Corporate Secure Plan. Through its unique process, ControlScan will conduct security tests and audits of Full Spectrum Solutions and certify the site's security.

"Privacy and security are the main concerns of consumers," says ControlScan President and CEO Richard Stanton. "Consumers want to do business with companies who take privacy and security seriously. By passing the audits associated with the Corporate Secure Plan, Full Spectrum Solutions visitors are reassured that this company is committed to protecting their personal and credit card information and providing a safe online shopping experience."

Once a company passes the security process associated with the Corporate Secure Plan they receive the Hacker Defended, ID Theft Protected, Privacy Protected and Business Background Reviewed certificates. These certificates are renewed daily, allowing Full Spectrum Solutions customers to receive independent third-party verification of the site's actual security before they decide to give out sensitive personal data.

"As information about privacy and security becomes more rampant, consumers are learning that it is not safe to give just any business their personal information. Likewise, businesses owners understand that they must take precautions to protect themselves and their customers from these criminals," said Michael Nevins, CEO of Full Spectrum Solutions. "By using ControlScan's Corporate Secure Plan we hope to give both parties the assurance that their transactions are secure."
