

ControlScan Certifies Deenashoes.com As A Safe Shopping Site

In an effort to increase its Internet security, Deenashoes.com, the leading online seller of women's wide shoes, today announced that it has become certified by ControlScan.

For Immediate Release

MARIETTA, Ga./EWORLDWIRE/May 30, 2006 --- As a measure to increase privacy and security and to prevent hackers from accessing sensitive information about its customers, Deenashoes.com hired ControlScan and subscribed to the Business Secure Plan. Through its unique process, ControlScan will conduct security tests and audits of Deenashoes.com and certify the site's security.

Once a company passes the security process associated with the Business Secure Plan they will receive the Hacker Defended, ID Theft Protected and Business Background Reviewed certificates. These certificates are renewed daily, allowing Deenashoes.com customers to receive independent third-party verification of the site's actual security before they decide to give out sensitive personal data.

"As information about privacy and security becomes more rampant, consumers are learning that it is not safe to give just any business their personal information. Likewise, businesses owners understand that they must take precautions to protect themselves and their customers from these criminals," said "Big Jim," Jim Dofton, owner of Deenashoes.com. "By using ControlScan's Business Secure Plan we hope to give both parties the assurance that their transactions are secure."

About Deenashoes.com

The company has been in business since 1972 and offers a large selection of quality wide and extra wide width ladies' shoes and boots at reasonable prices. They enjoy satisfying the needs of wide width customers with a variety of styles and prompt service.

About ControlScan

ControlScan provides third party verification and services to identify, measure and prioritize security, privacy, quality, accessibility and compliance risks that exist on corporate Web properties. ControlScan solutions provide the visibility and control necessary to evaluate a company's Web property risk exposure, and to put processes and procedures in place to effectively implement online governance strategies.
