IQinVision And Genetec Form New Partnership For Joint Solution

IQinVision continues to add new staff as IP Video market surges.

For Immediate Release

SAN CLEMENTE, Calif./EWorldWire/July 5, 2006 --- IQinVision, market leader in high performance megapixel network cameras, smart IP cameras, and network video recording systems, today announced a new partnership agreement with Genetec, Inc., as the demand for IP Video solutions continues to soar.

Based in Montreal since 1997, Genetec Inc. is a pioneer in IP video surveillance solutions and a leader within the physical security industry. Genetec's global network enables the company to effectively serve the North American, European and Middle Eastern markets. Genetec's success is built on its dynamic team of highly skilled individuals dedicated to the development of tomorrow's cutting edge security technologies. Genetec is recognized as an innovator in IP security products and related services through its creation of revolutionary solutions that are both reliable and user-friendly.

"IQinVision and Genetec together share the same core values of providing leading technology and offering quality customer service. This partnership is an important avenue for both companies to continue to meet the demands of the rapidly growing IP Video market," commented Paul Bodell, IQinVision's vice president of sales and marketing.

Surging market demand has also sparked the need for continued internal growth at IQinVision. Two new personnel have been recently added to the company. Lisa Bradshaw joined IQinVision as regional sales manager for the Mid-Atlantic territory. Prior to joining IQinVision, Bradshaw spent seven years with IPIX Corporation in various senior positions developing market strategies to increase sales and market awareness. In the engineering department, John Ringwood has joined the company as a new software engineer. Ringwood formally worked with ESS Technology on CMOS sensor development and has extensive engineering experience. IQinVision now has a full complement of regional sales managers in North America, along with an expanding international sales staff.

About IQinVision

IQinVision designs, manufactures and markets the IQeye family of high performance network cameras, intelligent video processors and network video recording (NVR) systems. Established in 1998, IQinVision is a privately-held corporation with headquarters in Calif. and regional offices in Lancaster, Pa. and Utrecht, Netherlands. A technology leader, IQinVision has redefined the surveillance and industrial video markets by introducing Hi Definition, Megapixel and Intelligent Video network cameras. The IQeye can act as a stand-alone system or integrate with other systems via a standard API or a Software Developer's Kit for full-custom applications. The IQeye's proprietary and time-tested Image Processing Operating System (IPOS) provides unrivaled image quality and network stability. The company's products are available as IQeye-brand, private-label and OEM models, and are widely used in government, institutional and commercial applications. IQinVision is committed to leading the industry in innovative products and world-class service and support.
