

ACCESS Unveils New Customizable Desktop Search Application

A LITE version of NatiVIEW Analytics makes e-evidence intelligence that much faster

For Immediate Release

WASHINGTON, D.C./EWORLDWIRE/Sep. 14, 2007 --- ACCESS Litigation Support Services, the leader in native file hosting and innovative discovery solutions for the legal industry, today announced the public release of their NatiVIEW(TM) Analytics LITE, a fully customizable desktop search application that enhances e-evidence intelligence for the legal community.

ACCESS has experienced a surge in demand for their highly-efficient native file review platform - NatiVIEW Analytics. Showcased earlier this year at LegalTech New York, the NatiVIEW Analytics hosting platform has grown into an international e-evidence intelligence tool "bridging the gap between foreign language documents and localized legal review. Along with the demand for international native file review, ACCESS has experienced an increased request for client customizations.

ACCESS' programming expertise for Web 2.0 environments coupled with this demand was the catalyst for the creation of NatiVIEW(TM) Analytics LITE. LITE allows users to customize their own review experience, search, cluster, and compare documents on their own desktop, and then synchronize that work product with their online e-evidence review. Additional features of the LITE application include document summarization and similarity analysis in an easy-to-use format that attorneys can learn to use in minutes.

"We aren't trying to dazzle you with our math - even though we use the latest in quantitative mathematical modeling. Review has to be easy and productive," explained Daniel Waldschmidt, CEO of ACCESS Litigation Support Services. "LITE brings the e-evidence review world into the Web 2.0 arena. Our clients are excited about using very robust, on-demand functionality with zero to little training."

LITE expands ACCESS' current scope in international electronic discovery by allowing clients to semantically conceptualize their data in EZ ACCESS(TM) Discovery - in over 70 different languages and regional dialects. Harnessed with a proprietary translation engine, NatiVIEW Analytics adds unparalleled collaboration to the e-evidence intelligence attorneys have come to expect from ACCESS' software solutions.

About ACCESS Litigation Support Services

ACCESS Litigation Support Services has been listed by Entrepreneur.com as one of America's 100 hottest companies. With headquarters in Washington, D.C. and a client user base around the world, ACCESS delivers high quality electronic discovery, paper discovery, and hosting services utilizing state-of-the-art facilities and proprietary software including EZ ACCESS(TM) Discovery and NatiVIEW(TM) Analytics.

ACCESS, a trusted partner to litigation firms, large corporations and government agencies, is known for "extreme discovery solutions" and providing outrageously high-quality customer service. For more information, visit '<http://www.accesslitigation.com>'.
