

JointREJUVINATE from Aurora Research More Effective than Glucosamine and Chondroitin Combinations

JointREJUVINATE, a new, patent-pending nutritional supplement, is 24 percent more effective than glucosamine combinations for regulating pain and maintaining joint health in clinical trials.

For Immediate Release

SAN RAFAEL, Calif./EWorldWire/Jan. 30, 2008 --- JointREJUVINATE, a patent-pending, condition specific nutritional supplement, has been found in clinical trials to be 24 percent more effective than combinations of chondroitin and glucosamine sulfates for regulating pain and maintaining joint health. After taking JointREJUVENATE for just 8 weeks, participants report:

- . Increased mobility
- . Decreased soreness
- . Faster exercise recovery
- . Less muscle fatigue

Laboratory studies have shown the ingredients in Joint REJUVENATE to promote collagen formation by up to 20 percent. This can decrease recovery time from:

- . Sprains
- . Sports activities
- . Joint irritation
- . Minor injuries

JointREJUVENATE is formulated to help maximize joint health, keeping bodies mobile, agile and moving freely. This is achieved by supporting the production of new cartilage, the material that covers and protects joints.

Unlike glucosamine and chondroitin sulfates which require significant processing by the liver, JointREJUVENATE interacts directly with the body's cells to promote collagen formation.

JointREGENERATE utilizes the unique action of the alkaline mineral strontium to increase collagen formation and also contains vitamins, minerals, and enzymes that support the health of joint cartilage. The ingredients in JointREJUVENATE are proven to help boost cartilage formation and regulate pain and soreness.

JointREGENERATE also contains the sulfur-rich compounds of glucosamine and chondroitin to aid in the formation of healthy cartilage tissue. JointREGENERATE was formulated by nutrition expert, university faculty, and member of the American College of Nutrition, Dr. Derik Anderson.

Aurora Research formulates and manufactures condition-specific, clinically-proven, patentable nutritional supplements that outperform currently available, gold standard products. Learn more by visiting 'http://www.AuroraSupplements.com'.
