

Flight from Open Air into Space inspired by Aircrafts Design Center

From Fibreglast to Flaps: Thrusting Passion into Orbit from Aircrafts Designers

For Immediate Release

SPRINGFIELD GARDENS, N.Y./EWORLDWIRE/May 30, 2008 --- From the jet age, to hypersonics and the race in the space age, passion to reach the beyond has propelled enthusiasts to set foot on the tarmac to take a spin on a maiden flight on crafts of various dimensions and designs, such as those developed by the team of Aircrafts Design Center.

Technological barriers in the aerodrome have thrust troublesome pot-shots at hot-shot test pilots, without managing to divert them from ardent pursuits in the control zone. According to Aircrafts Design Center Founder Mohamed Buhamad, harnessing the creativity behind conceptual design and molding the form for future aviation endeavors means bringing together tools and expert techniques in niche venues such as at '<http://www.aircraftdesigncenter.com>'.

"Although we're a fledgling operation, our goals are firmly set," said Buhamad. "All the information anyone needs to reach for the flight ceiling may be submitted by others without fee, in the interest of giving wing to airborne ventures."

A full complement of aircrafts design elements are on board:

- . Software - Specifically developed as a convenient way to create a complete conceptual aircraft design
- . Knowledgebase - From a pilot-builder who wants to design his own dream plane to amateur aircraft builders, presenting an understanding of the design process of aircrafts products
- . E-Books and DVDs - Detailing more specifically the aircraft design process
- . Products - Developments for new ideas or new concepts
- . Exploring - Flight conditions of an existing aircraft and the impact of modifications on existing aircraft

"Our mega aircrafts design mall offers to lift flight endeavors from the Nap-of-the-earth to Near Space," added Buhamad.

To submit entries, or to learn more about how Aircrafts Design Center can assist in blasting any conceptual aviation creation to the runway, visit '<http://www.aircraftsdesigncenter.com>'.
