PHOTO AVAILABLE: New IQeye 4 Series Offers Affordable, High-performance IP Video

IQinVision's sleek, compact megapixel camera features cost-effective reliability

For Immediate Release

SAN JUAN CAPISTRANO, Calif. And Lancaster, Pa./EWORLDWIRE/Sep. 3, 2008 --- IQinVision, market leader in high-performance megapixel network cameras, smart IP cameras, and network video recording systems, today announced the release of the IQeye 4 Series of cameras. The IQeye 4 Series is available in resolutions from VGA all the way up to high-definition 2-megapixel quality, and it sends power, video and camera management over a single network cable making the 4 Series easy to install (an IQeye hallmark) and simple to use.

The IQeye 4 Series is the newest member of the IQeye BASIC LINE, which offers IQinVision's world renowned ultra-stable operating system and superior image quality in a clean, small package with a simplified user interface. Like all IQeye cameras, the non-proprietary open-architecture means the IQeye 4 Series integrates seamlessly with all leading network video recording systems and video analytics systems. It ships ready-to-install and includes a high-quality lens and a versatile camera mount.

"The IQeye 4 Series is the newest member of our recently-created IQeye BASIC LINE. This line is targeted at cost-sensitive applications like the retail and residential markets that don't always require the full feature set of our IQeye PRO LINE," explained Paul Bodell, Chief Marketing Officer for IQinVision. "This new entry-level IQeye makes high-definition megapixel video quality highly accessible for just about any application."

The IQeye 4 Series will be publicly unveiled at the upcoming ASIS security tradeshow in Atlanta, Georgia, September 15-17, 2008. Customer shipments commence the first week of November.

About IQinVision

IQinVision is the world leader in megapixel IP video. Since 1998, IQinVision has been designing, manufacturing, and marketing the IQeye family of high-performance network cameras, intelligent cameras, and network video recording (NVR) systems. Committed to leading the industry with highly-valued products and customer service, IQinVision was first to market with HDTV and megapixel cameras and has received numerous awards from Frost & Sullivan, ST&D, Detektor, IIPSEC, and others. IQeye network cameras are renowned for image quality, stability, and reliability in the most demanding network conditions and environments. The IQeye acts as a stand-alone NVR or integrates with third-party NVR and video analytics software for enterprise-wide deployments. IQinVision products are available as IQeye-brand, private-labeled, or OEM models, and have been widely deployed in city center, property management, education, retail, casino, government, transportation, and a number of other vertical market applications. IQinVision is a privately-held corporation headquartered in San Juan Capistrano, California with regional offices in Lancaster, Pennsylvania and Utrecht, Netherlands.
