PHOTO AVAILABLE: IQaccess Software Now Available For All IQeye PRO LINE Cameras

Transforms IQeye network cameras into remote access/video alarm verification systems

For Immediate Release

SAN JUAN CAPISTRANO, Calif./EWorldWire/May 6, 2009 --- IQinVision (<http://www.iqeye.com>), market leader in high-performance megapixel network cameras, smart IP cameras, and network video recording systems, today announced the release of IQaccess remote monitoring software for sale to IQ certified partners.

IQaccess on-camera software alerts the user via a pop-up window on a PC whenever motion is detected, a doorbell is pressed, or another device triggers an IQeye network camera. Upon alert, the software enables the user to control the cameras relay to activate a door, control lights, sound a voice alert, or any of a wide variety of responses. To learn more, visit <http://www.iqeye.com/remote-monitoring-software.html>.

IQaccess was originally designed for the education market to allow receptionists and security personnel to view visitors and then grant access from a remote location. Other markets that have shown a strong interest in IQaccess include the hospitality industry to alert backroom hotel staff when late night guests arrive, and law enforcement to alert officers with video pop-up on their mobile PCs when an IQaccess event is triggered.

Up to eight onsite/remote clients can register a PC to receive alerts from each IQaccess-enabled camera, and each client can choose to receive notifications 24/7 or on a pre-determined schedule. Easy installation features include a simple PC application that can be downloaded for free from [IQeye.com](http://www.iqeye.com), and IQeye PRO LINE cameras can be field upgraded and continue to work seamlessly with existing NVR software.

"IQaccess is yet another example of how an investment in an IQeye camera today multiplies over the life of the camera," said Paul Bodell, IQinVision chief marketing officer. "IQaccess is a relatively simple program that expands the functionality of the IQeye and expands its role for the end-user from security surveillance to remote attendant and access control. Our customers can continue to look forward to more market-valuable applications like this from IQinVision."

About IQinVision

IQinVision is the world leader in megapixel IP video. Since 1998, IQinVision has been designing, manufacturing, and marketing the IQeye family of high-performance network cameras, intelligent cameras, and network video recording (NVR) systems. Committed to leading the industry with highly-valued products and customer service, IQinVision was first to market with HDTV and megapixel cameras and has received numerous awards from Frost & Sullivan, ST&D, Detektor, IIPSEC, and others. IQeye megapixel network security camera systems are renowned for image quality, stability, and reliability in the most demanding network conditions and environments. The IQeye acts as a stand-alone NVR or integrates with third-party NVR and video analytics software for enterprise-wide deployments. IQinVision products are available as IQeye-brand, private-labeled, or OEM models, and have been widely deployed in city center, property management, education, retail, casino, government, transportation, and a number of other vertical market applications. IQinVision is a privately-held corporation headquartered in San Juan Capistrano, Calif., with regional offices in Lancaster, Pa., and Utrecht, Netherlands.
