PHOTO: IQinVision Introduces High Definition 1080p H.264 Cameras

IQeye PRO LINE now has over 20 H.264 models

For Immediate Release

SAN JUAN CAPISTRANO, Calif./EWorldWire/Sep. 15, 2009 --- IQinVision ('<http://www.iqeye.com>'), market leader in high-performance HD megapixel network cameras, smart IP cameras, and network video recording systems, today announced the introduction of the IQeye HD1080p Series of H.264 cameras.

Available in both standard and true day/night models, the IQeye HD1080p cameras feature full duplex two-way audio, on-camera recording, and an analog video output for easy focusing during installation. These newest IQeye cameras are able to deliver multiple simultaneous H.264 and MJPEG streams, and are ideal for installations where bandwidth is at a premium.

"The on-board processing power of our IQeye cameras enables us to combine our world-renown image quality with the latest compression algorithms," commented Pete DeAngelis, president and CEO of IQinVision. "H.264 has received a lot of attention lately, but it isn't very well understood. We took the time to understand H.264 technology and its applications, and we've developed a camera that maximizes image quality while minimizing bandwidth and power demands. As with all of our cameras, the IQeye HD1080p delivers the industry's highest performance and the richest feature set."

IQinVision will begin taking orders for the IQeye HD1080p Series on September 21 and begin shipping in mid-October 2009.

About IQinVision

Since 1998, IQinVision has been designing, manufacturing, and marketing the IQeye line of megapixel/HD cameras. IQinVision is a world leader in IP video and intelligent network camera products and is committed to continued industry leadership with highly valued products and superior customer service. IQinVision was first to market with megapixel IP cameras, HD cameras with on-camera recording, and intelligent network cameras, while receiving prestigious industry awards from Frost & Sullivan, Security Technology Executive, Detektor, and the IP User Group.

IQeye megapixel network security camera systems are renowned for image quality, stability and reliability in the most demanding network conditions and environments. IQeye cameras are integrated with all leading Network Video Recorders (NVR) and can also be used for fail-over recording, as stand-alone event recorders, and as distributed processing platforms for video analytics. IQinVision products are widely deployed in government, military, city center, property management, education, retail, casino, transportation, and multiple other vertical applications and are available as IQeye-brand, private-labeled, or OEM models. IQinVision is a privately-held corporation headquartered in San Juan Capistrano, Calif., with regional offices in Lancaster, Pa., and Amsterdam, Netherlands.
