

Largest Solar PV Installation in Virginia to Date Breaks Ground With GreenBrilliance

For Immediate Release

HERNDON, Va./EWORLDWIRE/Jan. 5, 2010 --- GreenBrilliance announces that it has begun construction and commissioning of a 50KW pole-mounted commercial solar PV system.

As the largest solar system in the state of Virginia to date, this system is being installed on 19 poles on farm land and will be net-metered to offset almost 100 percent of the power consumed by the farm. This giant step by a Virginia business will not only make the business energy independent but will give it full control of its utility expenses for life while delivering significant reduction to the company's carbon footprint.

The new state grant for Solar PV installation from the stimulus money has made it even more attractive in the overall financial scheme of the project.

GreenBrilliance's commercial installation team targets to commission this project in the early part of 2010. "We are proud to be awarded this project and pleased that it has arrived at the right time to take advantage of the newly announced Virginia grant program," said Sanjay Chandra, president, GreenBrilliance.

Contracts for several large-scale projects to be delivered during in 2010 for application within commercial and government spaces, and for residential complexes, as well as in single-family homes, have positioned GreenBrilliance as a front-runner in delivering end-to-end, turnkey solar solutions in the state of Virginia.

To get more information on services and solutions, or to get a quote on an end-to-end, turnkey Solar PV solution, visit [GreenBrilliance.com](http://www.greenbrilliance.com) ('<http://www.greenbrilliance.com>') or call 1.888.365.ASKGB.
