

Sitestar (OTCBB: SYTE) Expands Wireless DSL Offering

FOR IMMEDIATE RELEASE

Martinsville, VA/ EWORLDWIRE/ January 8, 2003 --- Internet Service Provider Sitestar.net, Inc., a wholly owned subsidiary of Sitestar Corporation (OTCBB: SYTE), today announced it has deployed a major wireless network in Martinsville, Virginia.

"This announcement is consistent with our Broadband Initiative, further demonstrating our ongoing commitment to expand our high-speed offerings," according to Sitestar Chairman and CEO, Frank Erhartic, Jr. "We already have a nice wireless DSL Internet network in the Lynchburg, Virginia area and expanding this to the Martinsville area makes a lot of sense."

"Sitestar's Wireless DSL Internet provides another attractive broadband solution for our customers," commented Joseph Albanese, Executive Vice President and Director of Business Development for Sitestar. "Few companies our size are able to offer the wide array of high-speed Internet services that we do. Our broadband repertoire includes cable Internet (in selected markets), Landline DSL, Satellite DSL and Wireless DSL. In addition, we provide many businesses and institutional customers with services ranging from ISDN, to fractional T1, to full T1 and even DS3."

Sitestar's Wireless DSL Internet offering is primarily targeted towards the business market and is currently being offered in speeds up to six megabits per second. This Internet service does not require the use of a phone line, but rather an antenna aimed at one of Sitestar's tower sites. Business wireless service starts at \$59.95 per month.

About Sitestar

Sitestar is a publicly held company that invests in emerging technology-based enterprises. Its primary focus is rural and secondary markets of the mid-Atlantic region of the United States. Sitestar's wholly owned subsidiaries provide narrow and broadband Internet access, electronic infrastructure development, Web-hosting and design services, computer sales and repair and other technology-related solutions to residential and business users.
