

Senior IT Industry Executive John Pillow Joins Cyber Group, Inc.

Dallas executive John Pillow named vice president of new software engineering services division.

For Immediate Release

DALLAS/EWORLDWIRE/June 20, 2006 --- Cyber Group, Inc. today announced that John Pillow has joined the company as vice president, software engineering services division. Pillow will report to Tamim Shipchandler, senior vice president who heads up the division.

In his executive role with Cyber Group, Pillow will be responsible for the division's business development, sales and marketing activities. Shipchandler stated, "Cyber Group is extremely fortunate to have an executive with John Pillow's senior-level experience in sales and marketing in the IT services industry. In particular, his leadership will be crucial to the success of our new software engineering services initiative."

With 20+ years experience managing sales, marketing and business development for high tech companies in the services space, Pillow will be bringing this direct experience to bear on Cyber Group's new business. He has held management positions at Alliance Data Systems, PSSI, LodgeNet and SpectraVision as vice president of sales, vice president and chief administrative officer, director of service and operations and director of product development. Pillow holds a Bachelor of Science degree from the University of North Texas.

"The software engineering services sector is a key industry growth opportunity," said Pillow. "Success will result from radically lowering the customer's software engineering costs and substantially increasing the value and effectiveness of its solution. What impressed me about Cyber Group is management's commitment to delivering on this value proposition for customers, and the quality and depth of the combined near-shore off-shore software engineering team."

Pillow will be based at the Company's corporate headquarters in Dallas, Texas.

Cyber Group, Inc. is a leading provider of complex problem solving engineering services, with operations and offices in Dallas, Texas and Noida, India. Through its software engineering services division, it offers its customers a comprehensive, tightly coupled set of life-cycle software and system engineering services, i.e. services to support software products and systems through all phases of their product life-cycles: maintenance, enhancement, re-engineering, code implementation and deployment. The division offers particular expertise in maintenance, enhancement, re-engineering, user-interface and scripting for applications that are stand-alone or built on Web-based technologies and deployed with open source tools.
