

E-World Recyclers Receives Recognition

For Immediate Release

VISTA, Calif./EWorldWire/Feb. 4, 2008 --- E-World Recyclers, a Vista-based electronic waste recycling center, recently received a Special Recognition Award from the San Diego North Economic Development Council for outstanding efforts in community and economic growth.

The management team at E-World has been diligently working to regionalize San Diego's electronic waste streams in an effort to allow San Diego County residents to benefit from the economic incentives realized by this rapidly growing industry. All electronic waste was banned from California landfills last year, and handling the waste has become a multi-million dollar California industry.

"E-World Recyclers is dedicated to the proper disposal of electronic waste," said Bob Erie, CEO and co-founder of E-World Recyclers LLC. "Our vision is to be the leader within the electronic recycling industry, promoting and maintaining the highest level of environmental integrity and product stewardship."

E-World Recyclers operates a 46,000 sq. ft. facility in San Diego's North County region. The facility specializes in the environmentally safe recycling of thousands of tons of electronic waste each year, by utilizing proprietary separating equipment designed to make clean streams of raw materials. Electronic waste contains large quantities of glass, plastic, copper, steel and aluminum, all of which can be reused in the manufacturing of new products. Recycling electronic waste is not only good for the environment but spares natural resources and conserves energy. E-World Recyclers has diverted millions of pounds of hazardous materials from California landfills, created numerous San Diego based employment opportunities, and is a true benefit to the San Diego community.
