

## **Former Progressive Insurance CFO and Co-CEO Charles B. Chokel Joins Digi Inventory Board of Directors**

For Immediate Release

ORO VALLEY, Ariz./EWorldWire/March 13, 2017 --- Charles B. Chokel, former CFO and co-CEO of Progressive Insurance, and senior partner of White Mountains Insurance Group, Ltd., has joined the Board of Directors of Digi Inventory. Chokel's expertise and reputation in the industry are well-established and respected. His support validates the importance of DigiPro(R) online enterprise technology for contents claims, as well as several new platforms currently in the R&D pipeline.

According to Digi Co-Founder and COO Michael Cohen, "We welcome Chuck to our Board and are excited to move forward with a true visionary and icon of the industry as part of our leadership team."

In keeping with an aggressive R&D schedule, Digi Inventory is finalizing DigiPro Auto for launch. With customized worksheets for adjusters and vendors (auto repair facilities and rental agencies), interactive communication facilitates increased accuracy and efficiency. Updates on this program will be released soon.

DigiPro provides unmatched scope and capability for processing personal property-contents claims, while allowing carriers to save thousands of dollars per claim over obsolete third-party transcription and price search/replacement services. In addition, insurance companies can retain legacy systems in place while offering DigiPro's self-service option for claimants who prefer to feel empowered by being part of the claims process.

With the addition of Chokel to the Board of Directors, DigiPro software moves forward with claims technology to benefit insurers in the competitive global marketplace. Whether a carrier is interested in increasing profits or in simply chipping away at recent losses, Digi Inventory provides the contents claims solution.

### **About Digi Inventory**

Digi Inventory is a NEWCO from a non-traditional effort. The founders have decades of experience in technology fields of software design and architecture, as well as deep roots in the insurance industry.

Carriers must innovate to survive and thrive. The goal of Digi's leadership is to provide effective tools that transform the way contents claims are managed. Every insurance company can save money and become more efficient with DigiPro.
