

Digi Inventory Announces Finalized Agreement with Zoom Video Communications

Zoom Features Included Free to Users of DigiPro Software

For Immediate Release

ORO VALLEY, Ariz./EWorldWire/March 15, 2017 --- Digi Inventory announces finalization of an important license agreement with Zoom Video Communications, Inc., adding value to the core technology of DigiPro(R) personal property claims administration software.

Zoom services, now embedded into DigiPro under the license, include multi-channel targeted communication, one-on one or group, screen-sharing, MP4 and M4A local and cloud recording, in-meeting group chat, webinars, and cross-platform instant messaging, with availability for landlines/cell direct. There is no need to leave the secure medium of DigiPro's proprietary communication system throughout the entire lifecycle of a claim.

Michael Cohen, co-founder and COO of Digi Inventory, notes, "This agreement with Zoom is a game-changer. DigiPro technology currently holds 11 patent claims, with a global PCT filed to cover 148 other countries. The ability to offer Zoom services as part of our proprietary communication module provides a huge advantage for carriers who use DigiPro over others in the contents-claims marketplace."

Insurance companies which invest in DigiPro's very affordable, online enterprise claims processing program receive Zoom features at no additional charge. All parties involved in a claim - adjuster, claimant, vendors, administrators - receive unlimited intramural, high-definition video conferencing capabilities. Productive collaboration increases efficiency and conserves resources for carriers, while engaging 21st Century consumers.

With Zoom Video Communications integrated into the program, DigiPro software offers increased value for claim dollars spent. Whether a carrier is interested in increasing profits or simply chipping away at recent losses, Digi Inventory provides the solution. Additionally, Zoom features offer unique marketing opportunities to sell additional product lines.

DigiPro offers unmatched scope and capability for processing personal property-contents claims, while allowing carriers to save thousands of dollars per claim over obsolete third-party transcription and price search/replacement services. In addition, insurance companies can retain legacy systems in place while offering DigiPro's self-service option for claimants who wish to feel empowered by being part of the claims process. Zoom features enhance customer-centricity for retention.

About Digi Inventory

Digi Inventory is a NEWCO from a non-traditional effort. The founders have decades of experience in technology fields of software design and architecture as well as deep roots in the insurance industry.

The insurance marketplace must innovate to survive and thrive. The goal of Digi Inventory's leadership is to provide effective tools to transform the way contents claims are managed. Every Insurance Company can save money and become more efficient with DigiPro.
